

Mashed potato (HotMixPro)

Ingredients

- potatoes - 1kg
- milk (full or skim) - 185g
- salt - 3g

Preparation

- fit paddle to jug
- peel and dice potatoes into 1cm cubes

Add:

- paddle
- milk
- salt
- potatoes

Process:

- temp - 100C
- speed - 1
- time - 30min

Process:

- speed - 3
- time - 2min

Notes:

- Remember to put the paddle in first, or it's just annoying
- Potato, mashed potato, whatever, just chop them down to the suggested size
- I'm confident enough in the 30 minutes that I've programmed a recipe into the HMP so it automatically moves from cooking to mashing then stops. It always works (for me ☺)
