

# Wasabi cream

## Ingredients

- sour cream - 1/2 cup
- wasabi powder - 13g
- sea salt - 4g
- stevia - 1/2 tsp (measure this one, not weigh)
- water - 30g
  
- small mixing bowl

## Preparation:

### Add:

- wasabi powder
- water

### Process:

- mix well

### Add:

- salt
- stevia
- sour cream

### Process:

- mix well

### Notes:

This is great - mild enough for those who are a bit reticent to get really hot stuff into them, but bitey enough that those who want a good kick can just use a little it more and get it.

WARNING: be careful when making it - the fumes put onions in the shade when mixing the powder :-)
